Customer Reviews

Had been thinking for a while about getting an adult coloring book. I purchased this one for just under \$4.00. For the price I thought it would be a good way to get started. It is a book of Mandala designs, which according to Wikipedia means "circle" in Sanskrit and states that they are spiritual and ritual symbols in Indian religions, representing the universe. I was not sure I would enjoy coloring these designs. However, I think this is a very good book to start with because the detail is small and medium. In other words there is plenty of detail to keep an adult interested and to use a lot of creativity at the same time, but not too much that it is too difficult or tedious. I finished the one

below in about 1.5 hours. It took me another 30 minutes to paint it, since I was using water color pencils. I like the water color pencils because it gives creative options: one can use just the colored pencil, or go back over picture with a paint brush and create a watercolor look, which really brightened the colors and filled in the white space. For \$4 plus the cost of the pencils this is a great little book which will give me about 70 hours of entertainment and relaxation therapy. (I purchased "Stationary Cupboard 24 Water Color Pencils" which come with a brush and a sharpener. I would recommend these pencils)

I freaking love coloring and have found that "the craft of coloring" books are my FAVORITE adult coloring books (please see previous reviews). This is a book chock full of great designs that focus on a center, near-spherical shape in each design (much like the color), This is great because it means you can color the whole design without a design being cut off at the side of the page. Please see photos! I recommend this as a treat for yourself or as a gift for anyone over the age of 12. Love it!*Please rate my review as "Helpful" if it helped you because it helps me too! Thanks! I received this product at a discount in exchange for an honest & unbiased review. My opinions are my own.*

I have been dying to get one of these adult coloring books, so I could not wait to get started once this arrived. This designs in this book are so intricate and they are so relaxing to sit and color. There are 35 different designs and there are endless possibilities! The lines are not too thick and not too thin, they are easy to stay within the lines, but they do not take away from the beautiful colors you apply. The pages are thick and although I always use a board behind my pages, the colors usually do not leak through. I have used several different medias with this coloring book and they have all turned out great. I would definitely recommend this to anyone who enjoys coloring. It does take patience, but it is so relaxing that its worth it.

I have always loved to color. It's something I've never grown out of. Imagine my delight with this new craze of adult coloring books. This book is great it's filled with eye pleasing designs that are fun and very relaxing to color. I decided to use gel pens to color a few pictures in this book. I was worried about bleeding so I put a blank page behind the design I was coloring so it wouldn't ruin the next page. I was surprised to find that even with the more liquidy colors I had no problems with the color bleeding through the page. These also take some time to do because there is so much detail to the designs. I had a very relaxing day sitting outside and coloring. My daughter is very jealous that mommy now has her own coloring book.

I received my coloring book today. I have been coloring for years for stress release as well for a bit of creative inspiration. This is a pretty nice book with cool mandala designs throughout. There are 35 designs inside. I did subtract one star because the paper is kind of thin. I don't just color usually, I use watercolor pencils, inkblends pencils that also require an application of water, markers, pens and crayons. I know the paper wouldn't hold up to most of these but will be fine for pencils, pens and crayons. If you have some markers that don't bleed through the paper then you will be good on those too. Each mandala is blank on the opposite side so you aren't coloring through another design, however and that's a nice addition. I like that the creator of the book has put a hashtag inside so that you can share what you colored on IG and they allow you to photocopy the mandalas so that you can color them in different colors and play around to see which ones you like best! I did receive this review at a discounted price in exchange for an honest and unbiased review, which is exactly what I always give. I would, **WOULD** recommend this book to anyone that likes to color but most especially adults! There are a lot of relaxing hours tucked away between the pages, just waiting for me!

This is a beautiful coloring book but it does not have very much variety. The images are all pretty similar. Solid construction, thick paper with one image per page (no front/back images) so you don't have to be concerned with markers bleeding through. Overall, I still think it is a great purchase for the price.

I have a half dozen coloring books. This is the only one that the paper tears no matter which medium I use (pens, soft pencil, hard pencil, crayon, or pastel). Of course, most colors bleed. Designs are pretty. I will copy on to decent paper. Also, this is nice for beginners because the pages are small and not too much detail. But what good is this if the paper tears whenever you try to color.
