What others are saying about "LEED GA Mock Exam"... (Part I)

"GREAT STUDY TOOL!!! "My friend had told me about this book a week before my 2nd exam (yes I failed it the first time by one point could you believe it?) and it was a great learning tool! It really asked thorough questions and gave detailed explanations to the answers. If you can do good on these mock exams, you will do great on the real test! This guide really makes you utilize your knowledge and skill, other materials I had purchased prior to this were quite vague and uninformative, but this did the trick! Thanks Gang!" --Jason

Â "Good book... "I just pass the test with 183. The questions are more difficult that the ones that I saw in the test...That is good if you want to be sure that you will pass..." --Omar Reyes

Â "Nailed that LEED GA on the first try! "With this book, plus the 'LEED Green Associate Exam Guide' (also by Gang Chen) combined with all the free .PDF downloads printed from the USGBC website, I passed my LEED GA exam on the first attempt! This little book has 2 full mock-exams you can test yourself on throughout your studying to gauge when you are primed & ready to take the exam...Highly recommended." --Sarah Bartz

I got 193/200 on LEED GA exam by just using this book, I gave my exam after 15 days of prep (2-3 hrs each day). There was no other resource available for me to prepare for LEED GA and I relied solely on this book. The questions in the exam were directly from this book.

My friend had told me about this book a week before my 2nd exam (yes I failed it the first time by one point could you believe it?) and it was a great learning tool! It really asked thorough questions and gave detailed explanations to the answers. If you can do good on these mock exams, you will do great on the real test! This guide really makes you utilize your knowledge and skill, other materials I had purchased prior to this were quite vague and uninformative, but this did the trick! Thanks Gang!

Helped me pass the LEED GA with only a weekend of studying. Best to use this book as a practice but also look up every term that you don't know. If a question gives 5 options, don't just try to answer the question but also understand what the other 4 options actually are since they might be a term that gets asked in a different question. Most everything you don't know from the book can be found on google so no additional material was required for me.

I used this book as a supplement along with Gang's LEED Green Associate Exam Guide and some other practice exams found online as my primary sources for studying for the exam, and I passed! After studying the material from the Green book, I took the two Mock exams in this book as a gauge and scored under 50% correct in both. This scared me to study a bit harder a few days prior to my testing date which probably helped. What may have helped me more though were the explanations to the answers to some of the questions that I answered wrong as well as the websites that are referenced. Both mock exams included in this book are harder than the actual test which might be a good thing. I highly recommend taking additional practice tests as the questions in this book do not cover the entire range of subjects that may be covered on the exam. There are a few that can be found online for free. Also, if you need more practice some of my peers who passed the exam spent \$50 for this: <http://www.gbes.com/store/products/PTLEEDGREENASSOCIATE.html> For \$35, I think this book is a bit pricey for only two Mock exams. However, I would still recommend using this book for practice. I deducted a star because it's not a good representation of the actual exam in terms of difficulty and there are many typos and grammatical errors. See my review for the Green book (LEED Green Associate Exam Guide) for more info on how I passed.

I found these exams to be quite tougher compared to the others I took a look at, which is good as it made me prepare for the worst I would definitely recommend using these mock exams. Also in-depth explanations at the end makes your basics quite clear. I ultimately passed with 181 with 3 weeks of study. Best wishes to all.

The questions are too difficult and is not even close to what you'll see in actual exam! I took the tests a night before and just made me super stressed, then I just kept reading other materials and I passed the green associate with score 184 easily! I don't recommend buying this book and just download many applications of test on your phone.

The book was extremely helpful for me passing the exam. The questions really challenged me to dig deeper into the details of each category. I felt this was one of several tools to help me be prepared for the exam. I highly recommend this book.

I used this book as a review in the day or two before my exam. The questions in this book could very well be found on the exam, but most actual exam questions will not be as complex as they are made here. Most of these questions on these mock exams have a twist or trick and many can only

be answered if you know the materials backwards and forward. This makes for GREAT exam preparation because it makes you acutely aware of the types of tricks and the level of detail you MIGHT see on the exam. When I went in for the exam today my eyes were wide open. If you read what Mr. Chen states in his book, the exam has to test you on the main concepts more than the detail in order to make the exam and certification legally defensible. I hope Mr. Chen updates this book for the new Version 4 material soon so others will have the benefit of this book before they take the new Version 4 exam.
